

Boiler and Pressure Vessel Equipment Inspection Hotline

Call for scheduling

- Schedule an inspection after installing new equipment.
- Schedule an inspection for state or local jurisdictional certificate requirements.

Call for technical support

- Get information on jurisdictional codes and inspection requirements.
- Learn how to prepare for an inspection.

Church Mutual has partnered with Hartford Steam Boiler (HSB) to provide quality jurisdictional inspection services for boiler and pressure vessel equipment.

Most states require inspections

Virtually all states have requirements for the periodic inspection of boilers and pressure vessels to ensure that equipment is in good working order. Codes vary from state to state, but generally boilers and other pressure equipment must be inspected by commissioned inspectors at specified intervals for continued operation. The law or regulations might also require a certificate that attests the equipment complies with these requirements. HSB inspectors are familiar with the rules and requirements for jurisdictional inspections in your location.

How do you know if you need a jurisdictional inspection?

If you answer "yes" to any of the following questions, you might need an inspection:

- Do you have a heating or process boiler?
- Do you have a large (200,000 Btu) water heater?
- Do you have a pressure vessel, such as a commercial air tank or hot water tank?

How do you request an inspection?

Call the HSB Inspection Hotline at (800) 333-4677 or (800) 333-INSP between 8 a.m. and 8 p.m. EST, Mondays through Fridays. Please have the following information available when you call:

- Your Church Mutual account number
- Location name and address of each building
- Contact name and telephone number
- Certificate expiration dates (if known)
