

HOW TO START A FACEBOOK LIVE

ON A MOBILE DEVICE IN THREE EASY STEPS!

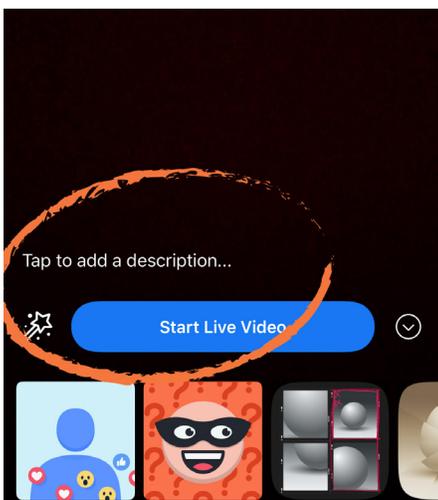

STEP ONE:

- Click **Create a post** at the top of your News Feed.

Note: You can click the Live button directly, but you will not have the option to write about your post.

Step Two:

- Place your recording device on something stable and steady.
- Click **Live Video**.

Step Three:

- Write something about your live video.
- Example description: *Join us for an inspirational message and prayer!* If you have online giving, don't forget to include the link.
- Click **Start Live Video**.

Tips for Success:

1. Do a test run to make sure your audio is clear. 2. Advise people not to wait before speaking when going live as this will deter people during replay. 3. Remember to check your copyright licensing if you plan on using music.
